

**We ensure safety
in risky environments**

Our knowledge - your guarantee for safety

Krusman Emergency Showers is a manufacturer and supplier of emergency showers and eyewashes. We share our knowledge about equipment and regulations with our customers and provide them with risk measurements. Our main objective is to save lives.

Krusman Emergency Showers is a well-established family business which started with Lennart Krusman selling emergency equipment in the early 70ies. Today the company is run by Daniel Krusman. We have more than 40 years of experience within the safety and health area and deliver emergency showers to Scandinavia, Central Europe and Middle East among others.

We have been manufacturing our own products since 1986 and we are certified with ISO-9001 and ISO-14001. Our products comply with the latest standards from ANSI, EN and AFS, as well as demands from other markets. Laws and regulations have changed with time, and so have we.

Business idea

We ensure safety in risky environments through overall solutions and own-manufactured emergency showers.

Vision

We shall ensure safety in all conceivable risky environments.

The importance of emergency showers

Corrosive acids, dangerous liquids and materials can cause serious injuries. In Sweden several hundred cases of eye and body damages due to dangerous substances are reported yearly, according to the Swedish Work Environment Authority.

It is extremely important that safety equipment is in proximity and can be reached directly. If an accident occurs, flushing must start immediately after the victim has been exposed to dangerous liquid or material.

Delayed "first aid" treatment can result in severe injuries.

Dangerous substances for eyes and skin:

- Corrosive acids
- Alkaline substances
- Hot materials and liquids

How do you value your sight?

We do not believe that you really can. However you can put a price on the equipment that can save your sight, your health and even your life in some cases.

We supply our products in line with our customers' needs

Different customers have different needs; therefore we produce our equipment in various materials and with different accessories. By doing so we can ensure that the equipment will function at its best in different environments. We offer eye- and facewashes, emergency showers, decontamination booths and tank showers both chilled and heated. Our product range also includes unique portable eyeshowers for indoor and outdoor usage as well as inside vehicles. Any product can be ordered for EX-classified environments.

Emergency showers and eyewashes are necessary in the marine industry, processing industry, chemical and food industry as well as refineries. Our responsibility is to recommend the right emergency equipment for the right place at the right time.
