

3846

Emergency shower with tempering, wall mounted

Emergency shower with thermostatic mixing valve 3845, galvanized steel pipes and shower head in powder-coated stainless steel. Stay-open ball valve, operated by a pull handle or pull rod for a crawling person. The water supply should be designed for a minimal flow of 76 l/min at a pressure of 2,4 bar.

Install the shower at approximately a height of 2150 mm measured from the floor to the lower edge of the shower head.

Emergency signs are enclosed with each safety station.
