### Mixing valve for eye- and facewashes

The thermostatic mixing valve has built-in non-returning valves and filter. It provides tempered water when the eye- and facewash is in use and breaks hot water supply if the cold water fails. If the hot water fails the cold water will continue.

Recommended temperature on outgoing water is 20-30° C. Desired outlet temperature is adjusted by the temperature cap. Temperature knob locks when the temperature is set.

#### TECHNICAL INFORMATION

Capacity:	30 L/min	Width:	90,5 mm
Water supply cold: DN 15		Height:	110 mm
Water supply hot: DN 15		Depth:	60,5 mm
Water supply temp.: DN 15		Pressure:	3-6 bar
