### Mixing valve for emergency showers/safety stations

The thermostatic mixing valve is delivered with chromed brackets and check valves, which are attached at installation. The cartridge is a unique sealed-for-life unit utilising proven durable high-technology materials for service-free use. At any malfunctioning, the entire cartridge will be replaced. It contains two thermoscopic temperature sensors to provide water at safe, accurate temperatures of the outlet water. The desired temperature is adjusted by the temperature knob. At the time of delivery, the outlet temperature is set on maximum. It can only be changed by authorized personnel. Recommended temperature is 20-30° C. The temperature knob can be locked.

#### TECHNICAL INFORMATION

Capacity: 190 L/min	Width: 235 mm
Water supply: DN 25	Height: 150 mm
	Depth: 200 mm
