

DBX 24

Electronic flow heater for eye- and facewashes

Electronically controlled instantaneous water heater for supplying hot water to one or more points of use. The electronic automatically adjusts the power consumption according to the inlet temperature and the flow rate in order to stabilise the outlet temperature. The factory pre-set outlet temperature is 50 °C and can be mixed with cold water via the external sanitary tap.

The outlet temperature can be modified inside the heater between 30°C and 60°C. The appliance is designed for easy installation and can be fitted quickly and easily, even in case of replacement.

TECHNICAL INFORMATION

Power rating at 3/PE 400 V~	24 kW
Rated current	35A
Min. – max. flow rate (l/min)	2.5-8.0
Hot water outputM at $\Delta t = 28$ K	
(from 12 °C to 40 °C) in l/min	12.3
Content; design (nominal pressure)	0,4 litres; closed-outlet (10 bar / 1 MPa)
Type of protection, safety mark	IP25
