

MS400

Heater for emergency showers

Heater with 400 litre should be installed vertically on a suitable base. (also available in volumes 600 and 1000 litres). The secondary water can be heated by electric immersion heaters or indirect flow and return heating from a boiler. If required the cylinder can be supplied for connection to both heat sources. The working thermostat's are adjustable between 55°C and 85°C.

Cylinder construction:

Manufactured from copper lined steel having a uniform thickness with all seams fusion welded. Every unit is factory pressure tested to 15 bar and has a working pressure of 10 bar.

Insulation:

CFC free conventional glass wool. The insulation will not encourage vermin or bacteria and is not susceptible to damage from moisture. The outer casing is manufactured from plastic coated mildsteel having an attractive blue finish.

TECHNICAL INFORMATION

Volyme	380 litre
Weight	110 kg
Max kW Rating	2,5-15 kW
Voltage	400 V 3-phase
